

We live in a world where our everyday lives - both personal and professional - are increasingly online. Our ability to conveniently shop, bank, work and socialize online is rife with both opportunity and risk. Unfortunately, it's easier than ever for fraudsters to get their hands on our personal information. Cybercriminals can target individuals with phishing scams, take over online accounts, or simply buy our personal data on the Dark Web after a data breach for just a few bucks.

While employees and their families are searching, streaming, and scrolling, digital crime continues to soar – putting the things they care about most at risk. Even the most vigilant individuals can become identity theft victims. That's why MetLife and Aura have combined forces to offer the top-rated all-in-one digital security solution as an ancillary benefit.
